OBJECTIVE

Associate Software Engineer with early professional experience in backend development and system optimisation. Recognised for reliability, curiosity, and initiative. Passionate about Artificial Intelligence and Robotics, with a strong desire to explore, learn, and contribute to research and innovate. Eager to take on practical challenges, grow as a developer, and build expertise in emerging technologies to create impactful and innovative solutions.

TECHNICAL SKILLS

Languages: C#

Databases: PostgreSQL

Tools & IDEs: Visual Studio, VS Code, Git

Learning & Exploration: Beginner-level exploration of FlutterFlow and React Native through AI-assisted personal experiments.

SOFT SKILLS

- Analytical, observant, and strong at problem-solving
 - Adaptable and quick to learn; thoughtful in decision-making
 - Hardworking, dependable, and a collaborative team player
 - Supportive and proactive — enjoy mentoring and helping others
 - Positive and enthusiastic, with a focus on finding solutions and contributing effectively
-

EXPERIENCE

Assistant (Import-Export) | Aman Export, India | Nov 2020 – Dec 2020

- Researched domestic and global product prices to support sourcing and export decisions.
- Gained early experience in research, accuracy, data handling, and understanding international trade processes.

WordPress Developer | Target Media and Press Release Ltd., Mumbai | Dec 2020 – Mar 2021

- Assisted in developing and maintaining responsive WordPress websites.
- Improved site performance and user experience through layout and optimisation updates.
- Learned practical aspects of website development and client collaboration.

Associate Software Engineer | Casepoint Pvt. Ltd., Surat | Feb 2022 – Mar 2023

- Contributed to backend development and performance optimisation to improve system reliability.
- Supported the integration of new product features in line with project goals and client requirements.
- Resolved daily operational issues and maintained smooth product functionality.
- Collaborated across departments to coordinate updates and ensure effective communication.
- Recognised for adaptability, responsibility, and proactive knowledge sharing.

EDUCATION

Master of Computer Applications (MCA) | 2018 – 2020

Bachelor of Science in Information Technology (BSc IT) | 2015 – 2018

PROFESSIONAL DEVELOPMENT

Since 2023, I have been independently exploring software development and modern technologies. During this period, I initiated several small personal projects using AI-assisted development tools. Although these projects were not completed, the experience was valuable and highlighted the need for stronger technical foundations and real-world exposure.

To restart and strengthen my professional path, I am now following a structured learning roadmap focused on rebuilding my technical base and aligning myself with current industry standards. I am beginning with Udemy courses to reinforce my core development skills, followed by Coursera specialisations to gain recognised certifications in high-demand technologies.

My goal is to apply this learning effectively in a professional environment and build a stable, long-term career, with the ambition of contributing to advanced fields such as AI, robotics, and research-driven software innovation.

INTERESTS & HOBBIES

Passionate about Artificial Intelligence and Robotics, with a long-term goal of contributing to research-driven and innovative solutions.; enjoy playing football, reading manga, and watching anime.
